

## FCIGL Report – Reșița, 6<sup>th</sup> of May 2014

The Final meeting for the FCIGL project that took place in Reșița on the 6<sup>th</sup> of May 2014 was a great chance to discover the greenest part of Romania and to make a 360 degree experience: we learnt about the culture, the traditions, the natural environment and also the school system of the country.

The project meeting itself was very interesting because the teachers of Collegiul Technic of Reșița – who organized the meeting - made us visit their professional high school and explained the difficulties that this kind of schools have in finding new students.

The Romanian partners also organized visits to the most important landmarks of the region, such as the major lakes near Reșița, the Museum of Locomotives and the German village of Garana, where we had the opportunity to taste local products. We also visited the Museum of the Revolution in Timișoara where we learnt about one of the most important event of the Rumanian contemporary history.
